## CANNAS

Cannas make the best showing when planted in beds  
by themselves. The soil should be well fertilized and  
worked up thoroughly to a depth of 10 to 12 inches. The  
bulbs can be set about 12 inches apart and about 4 to 6  
inches deep. Mulchings with lawn cuttings will help re-  
tain the moisture. Start bulbs in pots indoors in March  
or April. Do not set out until all danger of frost is over;  
about June 1st here in the Northwest.

**City of Portland.** Large blooms in good-sized clusters, medium  
rose-pink, strong stems well above the green foliage. One  
of the best pinks.

**The President.** 4 ft. tall. Glowing scarlet, blue-green foliage.  
Extra large trusses of brilliant color. The finest Red Canna  
of today. The foliage is entirely free from disease.

**Yellow King Humbert.** 5 ft. tall. Deep rich yellow, heavily  
spotted and flecked with deep red. Green foliage.

**Red King Humbert.** 5 ft. tall. The grandest Canna ever offered,  
a king in reality. The heart-shaped leaves are purple-mad-  
der over-bronze. The plants are crowned with immense heads  
of orchid-like velvety orange-scarlet, rose-tinted and blossoms  
incomparably beautiful.
